

BEEC and the Halifax Beaver Working Group bring you:

# Halifax's Wild Waterways: A look into the past

**Saturday, September 23 at 1pm  
Halifax Community Hall**

Engineer and river scientist Dr. Denise Burchsted studies natural river systems—the way rivers behaved before Europeans arrived. What she has learned will surprise you. Dr. Burchsted has mapped the town and will share her conception of what the watery world of Halifax looked like. We hope to see you at the Community Hall to travel back in time.
